

HOGAN LAND SERVICES

A CALIFORNIA CORPORATION

One of the largest challenges for development projects is handling Storm Water. Violations of existing and new laws can cost your project big fines.

Ken Carr and his Civil Engineering team have built trusted relationships with the regulatory agencies and those responsible for developing and enforcing water quality regulations over his career spanning 40 years.

Turbidity

Erosion

He provides expert advice, solid compliance practices, and quality control monitoring in line with Federal, State and local water quality regulations, both during and after construction.

Let us provide you with a plan of attack and inspection during this winter season on your next project.

NEWS ANNOUNCEMENT | With great pleasure and pride, the management of Hogan Land Services has appointed Adam Rivera "Chief of Surveys."

Adam Rivera PLS 8451
Chief of Surveys

BACK STORY | At the young age of 14, Adam recalls the first time he attempted "surveying" his grandfather's 190 acre land with a tape measure and compass. Then later in high school Adam learned enough about surveying to know it was the career for him.

Licensed as a Professional Land Surveyor since 2008, Adam has gained great respect from the surveying community. Through hundreds of hours of collaboration with other surveyors, attorneys, title companies and agencies, Adam has become a valued source for decision making. He continues in full charge of the Surveying Department at Hogan Land Services, and now, as Chief of Surveys, all decisions regarding boundary location, topographic data management and construction staking will rest on Adam's capable shoulders.

We are fortunate to work with some of the North Bay's most distinguished Builders.

Janver Holly, Holly & Associates - talks about how he was able to adapt to the changing economy.

Congratulations to Daniel Byrne, of our offices - our most recently licensed Registered Civil Engineer. Daniel passed his battery of exams on the first try.

Daniel Byrne

Background | Being a Sonoma County native, Daniel always knew he wanted to become an engineer. The desire to design and build structures drove his ambitions to further his education at UC San Diego. There he obtained his degree in Civil and Structural Engineering. Daniel has expressed his gratitude to us for providing him the opportunity to work in all areas of engineering: structural calculation to septic design to architectural development.
